PROJECTS

Silver Twilight Club — github.com/MitchGuth/silverTwilightClub

SEPTEMBER 2018 — LIVE WEB PAGE: silvertwilight.club

- Worked with other developers to create a multiplayer text-based game utilizing database queries, AWS and Express.js.
- Designed and engineered most of the UI for the single, dynamic web page, as well as the login/sign-up feature.

Shiba Sensei — github.com/nat-sharpe/Shiba-Sensei

AUGUST 2018 — LIVE WEB PAGE: nat-sharpe.github.io/Shiba-Sensei

- Spent a week with two team members building a timed puzzle solving game. Used an external API of random Shiba Inu images.
- Wrote the main functions of the game logic. Figured out ways to randomly divide the images and move the puzzle pieces.

Vikingram — github.com/nat-sharpe/Vikingram

JULY 2018 — LIVE WEB PAGE: vikingram-44fd1.firebaseapp.com

- Created a web page based on Instagram with JavaScript-generated galleries and a modal slideshow.
- Explored CSS techniques, jQuery and HTML5 Audio.

EXPERIENCE

Private Eye Antiques — Charlotte, NC — *Owner*

OCTOBER 2015 - JUNE 2018

Purchased and sold historical artifacts to customers locally and around the world. Made effective use of win-win negotiation, market research and capital management.

Schwan's Home Delivery — Hillsboro, ND — *Route Sales Rep.*

NOVEMBER 2013 - OCTOBER 2015

Sold and delivered frozen food to customers at their homes. Practiced diplomatic sales while maintaining a tight schedule. Identified prospects and helped them transition into long-term customers.

BIO

User-focused software engineer who combines a love of logic, psychology and visual media to create applications which are both attractive and efficient.
